All material © 2023 Youngstown State University

This report contains top-line monthly numbers from a purposive sample of forums and discussions collected from 15 platforms that are known for hosting misinformation, extremism, and conspiracism (MEC sector).

This project receives funding from the Ohio Supercomputer Center through a faculty grant.

Preface to the March, April, and May 2023 Reports

The monthly reports were delayed to address numerous issues that converged at the same time, including (1) concern about a one-time event substantively impacting the timeline, (2) the recent inaccessibility of some channels to automated techniques, and (3) methodological changes. The reports for March, April, and May are issued simultaneously. June and July are in progress.

One-Time Event

The initial March data collection identified a steep decline in activity tied to 3 channels, and low levels continued through April and May. After examination, I found rate limits added to 2 of the 3 channels after the March event, and I had to adjust the scraper accordingly. Based on past history and reports from another channel not in the study, I have concluded that there was probably a cyberattack directed against multiple Extreme-Right forums. However, with rescraping the data with adjustments, the decline in activity was limited to only one channel, which rebounded some in activity in subsequent months. The rate limits will dramatically affect turnaround times in the research going forward.

Inaccessibility of Some Channels

- Reddit has shut down use of Pushshift API for researchers as part of going public. Reddit constituted approximately half of the purposive sample, and its loss has substantively impacts estimates of Conspiracy/Fringe and Extreme Left forums.
- Telegram exports are now completely automated. Telegram broadcast channels are sometimes accompanied by private chat channels that have public invitations, and there were 57 of these channels in the study. When manually downloaded, they appear as public, but with automation appear as private and have been removed because private material is not included in the study and their history has been removed..
- Several other Telegram channels have ceased supporting public chat channels. This is sometimes used as a strategy to minimize bot activity in an online community. The history of these channels is included in this study because the removal of these channels represents a legitimate decline in activity that should be counted..
- Twitter is not included in the study, so the removal of academic researchers from the Twitter API has no impact. It is possible that some of this activity has moved to Twitter, which is outside the purposive sample, though this is hard to verify.

Methodological Changes – Current and Forthcoming

- The minimum word length in the study has been dropped from 50 words to 25 words.. The tag rate remains over 90%, which is a dramatic improvement from when the study was first launched and is a consequence of continuous additions to the program code.
- Incel.is and hexbear.net were rescraped after changes were detected on those platforms. The result was an expansion of historical material available on each platform.
- The purposive sample is being revised to incorporate a select groups of web sites, YouTube, and adjustments due to the loss of the loss of Reddit and the 57 Telegram chat channels. It may take several months to include these changes.
- 4chan’s r9k is being added to the study. This is a large scrape and may take 2 to 3 months.
- Note the use of the term “prevalence rate” rather than % posts. This change is in preparation for adding a second metric of activity to be called the density or density or density rate. Densities will begin appearing with June or July data and take several months to phase in. A high prevalence rate is now defined as presence of frame in 25% of posts
- Frame definitions are being expanded to incorporate forum types. The notion of the “composite” used with religion becomes obsolete once this is implemented.

Activity Summary

Methodological Notes: Activity levels are defined as the % of posts with at least one key word, phrase, or stem identified with particular themes. Because the study of language and ideology is a key aspect of the larger project, results are limited exclusively to posts with at least 25 words. The complete list of current platforms from which forums were selected can be found toward the end of this document. A user's manual and program code can be found at <https://www.rogersperspectives.com>. Any corrections for errors will appear in next month's report.

Key Trend

Activity in the purposive sample fell 7% in May. This decline is the continuation of a long-term decrease in the MEC sector. Activity levels have fallen 63% since their peak in August 2021 and 16% since February (Fig. 1 and 2). In spite of this decline, Political Right and Patriot / Military forums increased for the 3rd consecutive month in response to the various investigations into and charges against Donald Trump. Political-Right activity has increased 32% since February, and Patriot/ Military channels have increased 36% (Fig. 4). Caveat: Decreases do not capture movement to Twitter, which is not included in this study.

Other Trends

Average daily balances fell from 8,486 posts per day in May to 7,876 posts per day (Fig. 1 and 2).

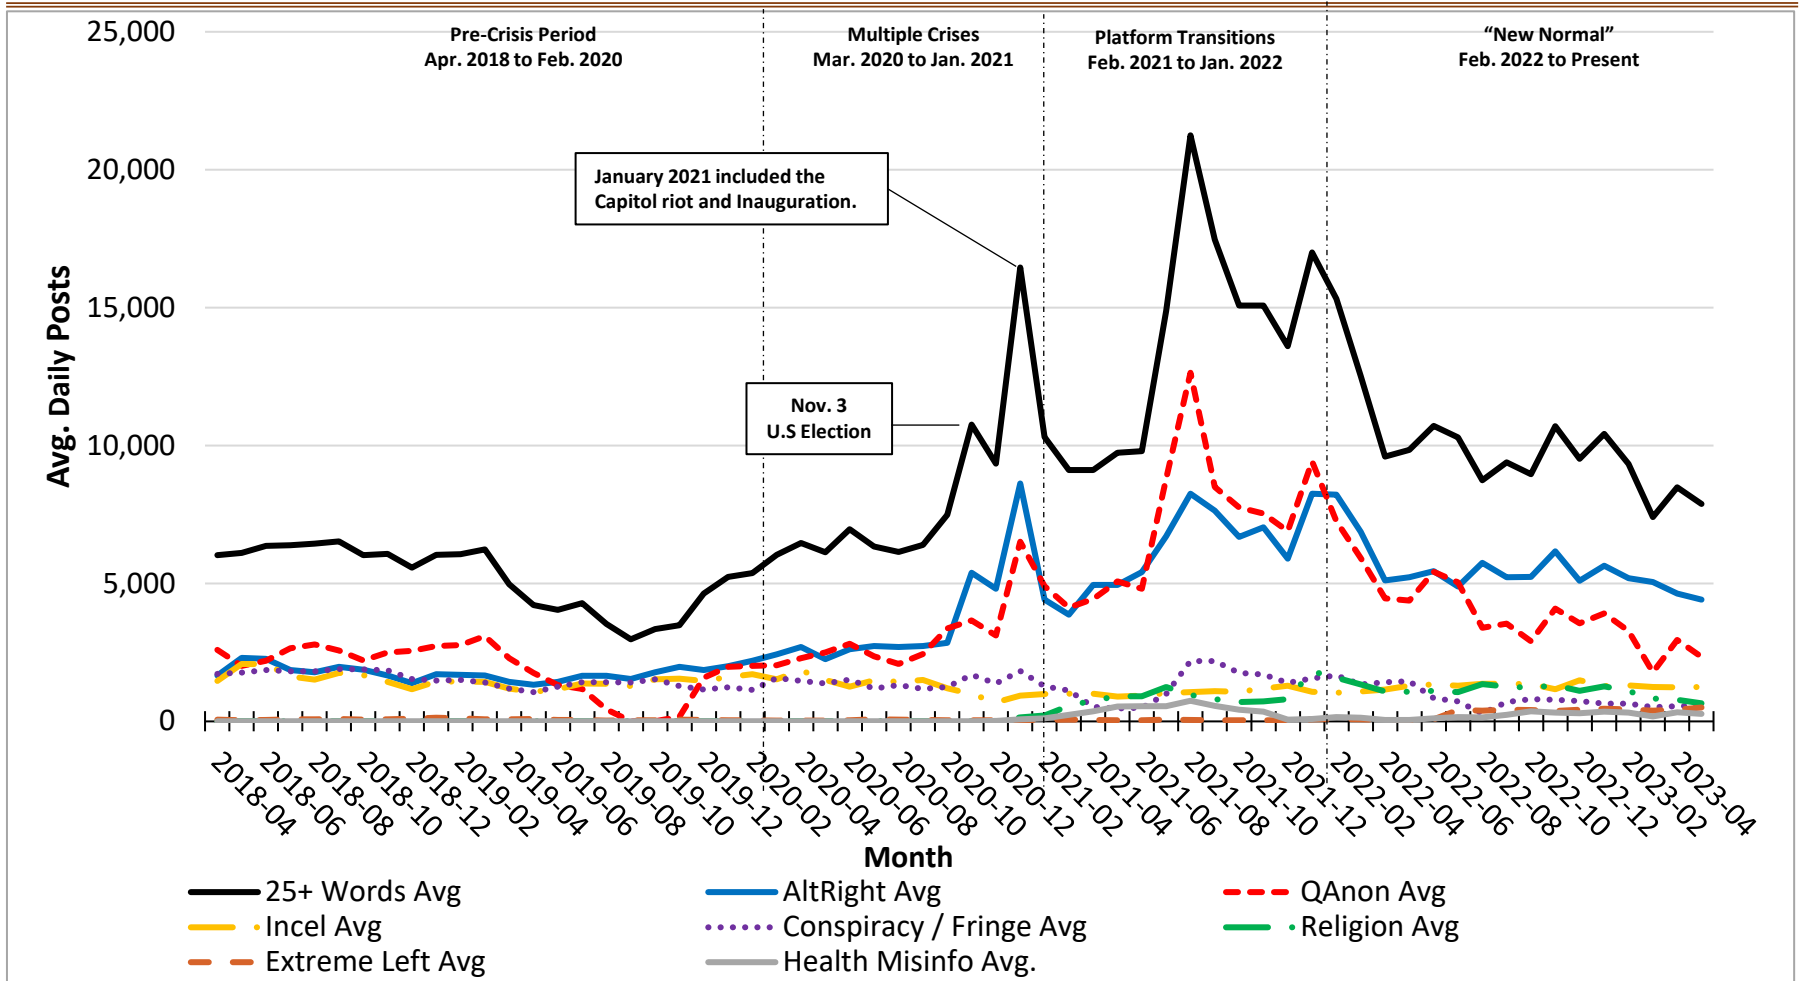

Activity in both QAnon forums and the QAnon frame fell 21% in May. QAnon forums have fallen 81% since August 2021, and the QAnon frame has decreased 58% (Fig. 1, 2 and 16).

In spite of increases in activity related to the Political Right and Patriot / Military and QAnon forums, the prevalence of violent / aggressive discourse remained at 22% in May. For the second consecutive month, no forum type crossed the threshold defining high prevalence (Fig. 7).

The prevalence of religious discourse fell from 33% to 32% in May. In spite of the decline, the prevalence of religious discourse in the purposive sample remains high and may be an artifact of a deliberate effort to include religious extremism and online "prophetic" communities in the sample (Fig. 8).

Figure 1

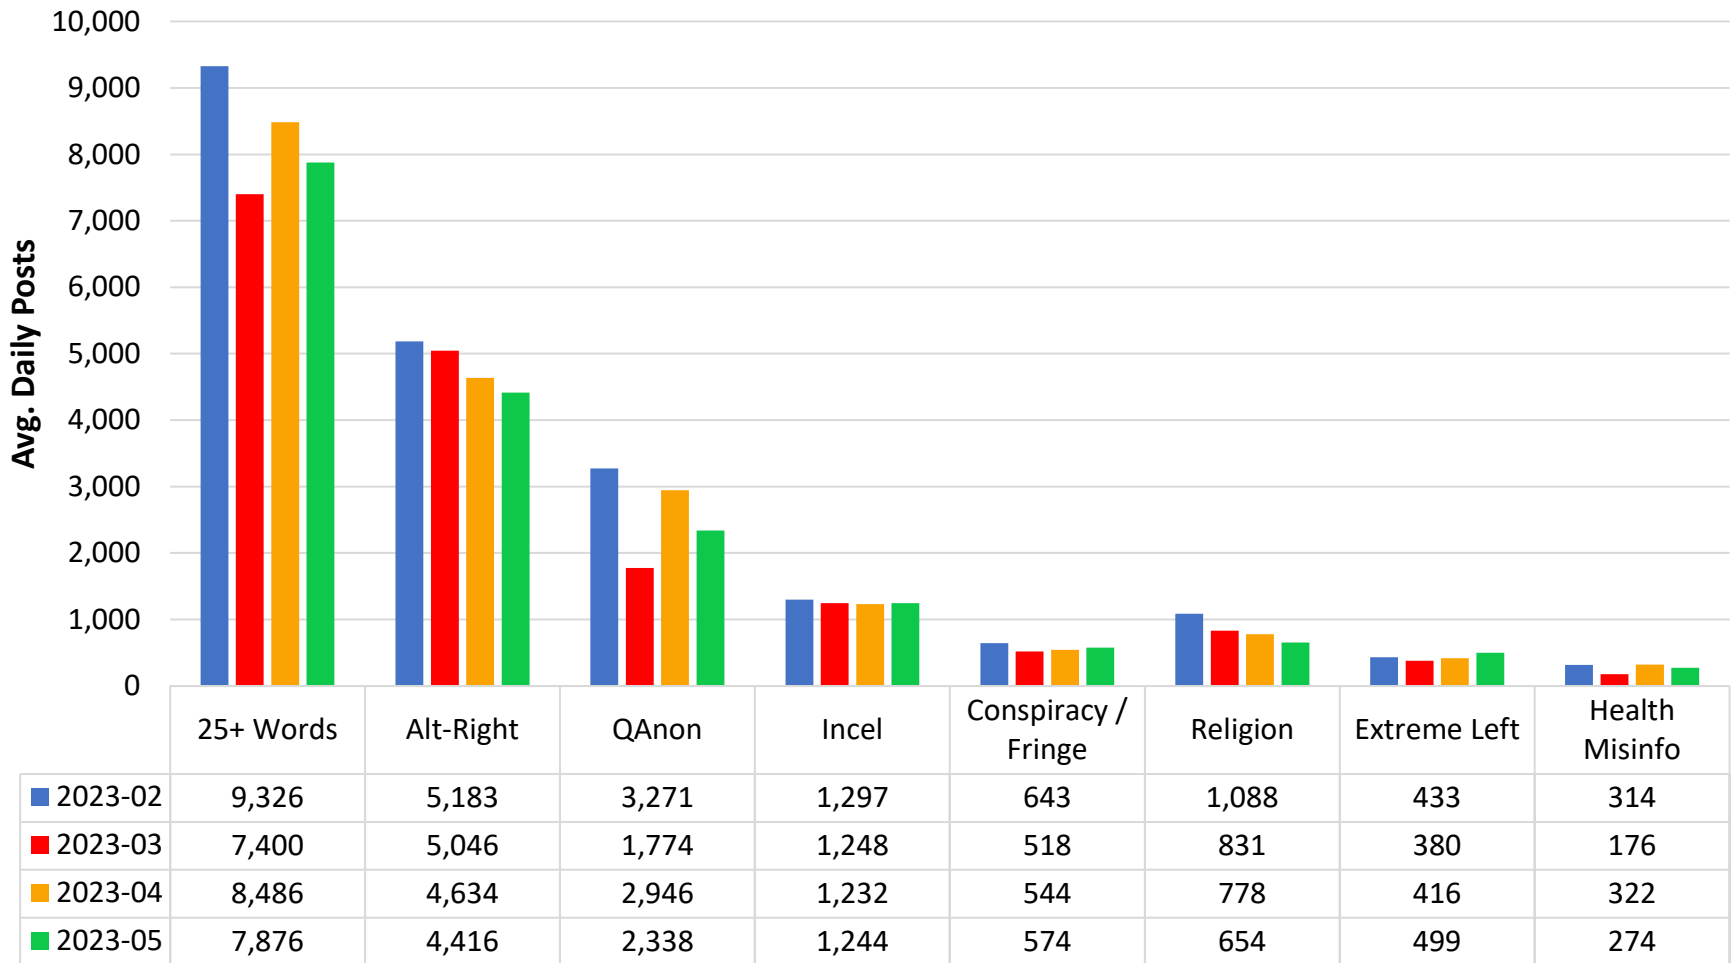

Avg. Daily Activity by Month

Note: 16,122,229 recovered posts with at least 50 words. Forums are not mutually exclusive. QAnon forums could be classified as both Conspiracy/Fringe and Extreme Right, but QAnon forums are separated due to their size and influence. This report uses a broad definition of the Alt-Right supergroup, which include both Extreme-Right groups (e.g., neo-Nazis, Boys, secessionists) and right-leaning groups with which Extreme-Right groups appear to be forming ideological alliances (Rogers, 2021). The breakout of the Alt-Right can be found in Figure 3.

Periods: The period of multiple crises refers to the influence of the COVID-19 pandemic, BLM protests, and 2020 presidential election activity. Platform Transition highlights the rise of new extremist and conspiracists forums in the universe of platforms, many due to their expulsion from Facebook and Twitter and the collapse of Parler.

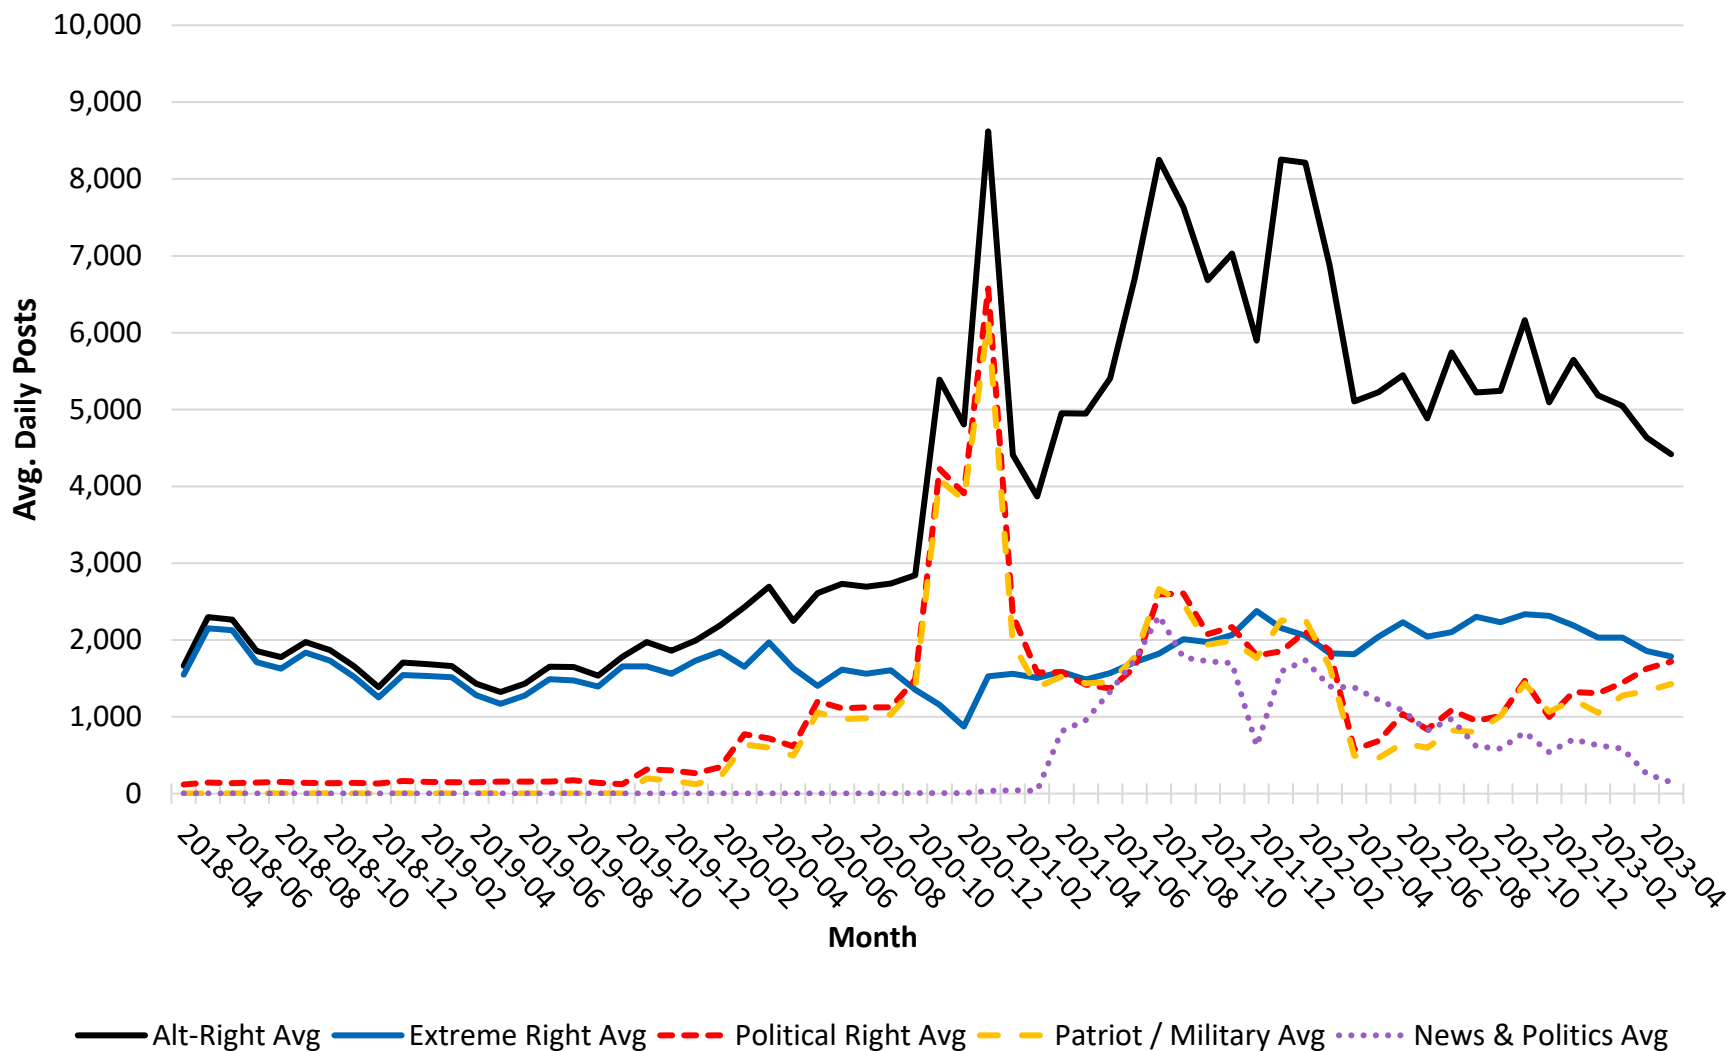

Figure 2 Avg. Daily Activity for Past Four Months

Note: 989,244 recovered posts with at least 50 words. Forums are not mutually exclusive. QAnon forums could be classified as both Conspiracy/Fringe and Extreme Right, but QAnon forums are separated due to their size and influence. This report uses a broad definition of the Alt-Right Supergroup, which include both Extreme-Right groups (e.g., neo-Nazis, Boys, secessionists) and right-leaning groups with which Extreme-Right groups appear to be forming ideological alliances (Rogers, 2021). The breakout of the Alt-Right can be found in Figure 4.

Figure 3

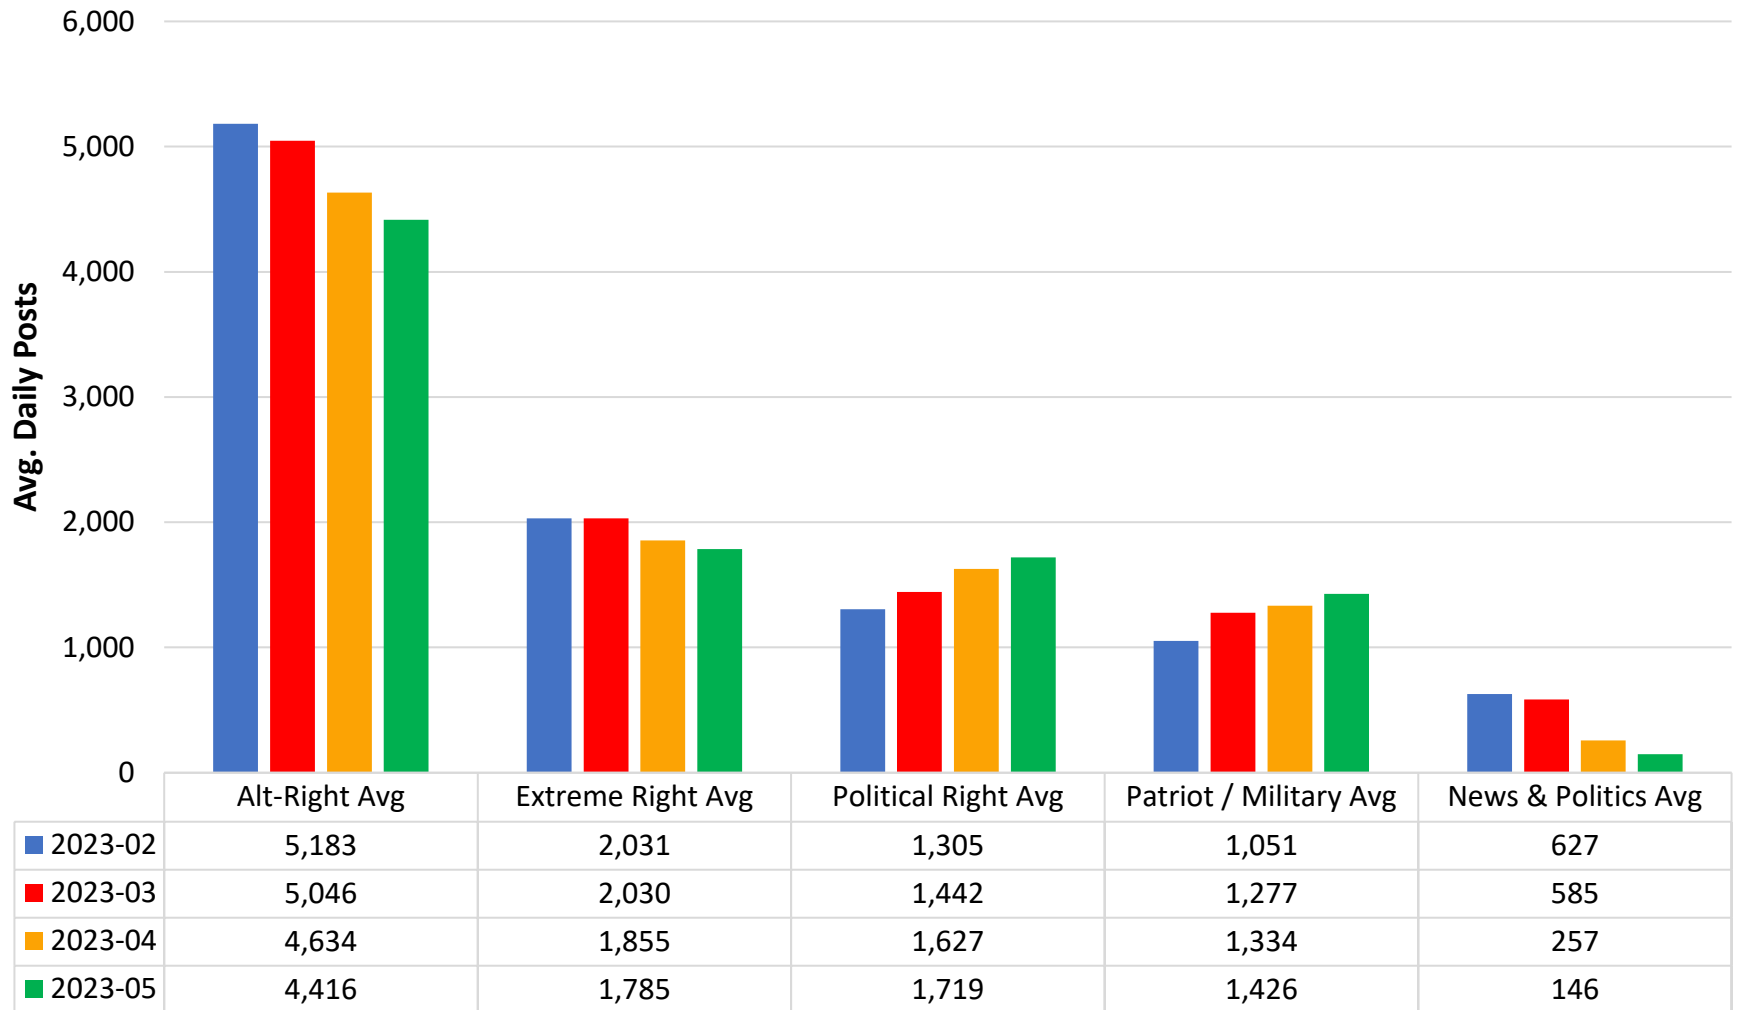

Avg. Daily Activity by Month for Alt-Right Supergroup by Month

Notes: 7,377,156 recovered posts. These groups are a subset of forums classified as Alt-Right in Figure 1. The category Extreme Right includes but is not limited to neo-Nazis, Proud Boys, secessionists, and sovereign citizens. The Political Right includes partisan groups related to MAGA and libertarianism. While this study does not examine mainstream political sites, the discourse of partisan forums selected for the purposive sample often strays beyond normal partisan discourse.

Figure 4

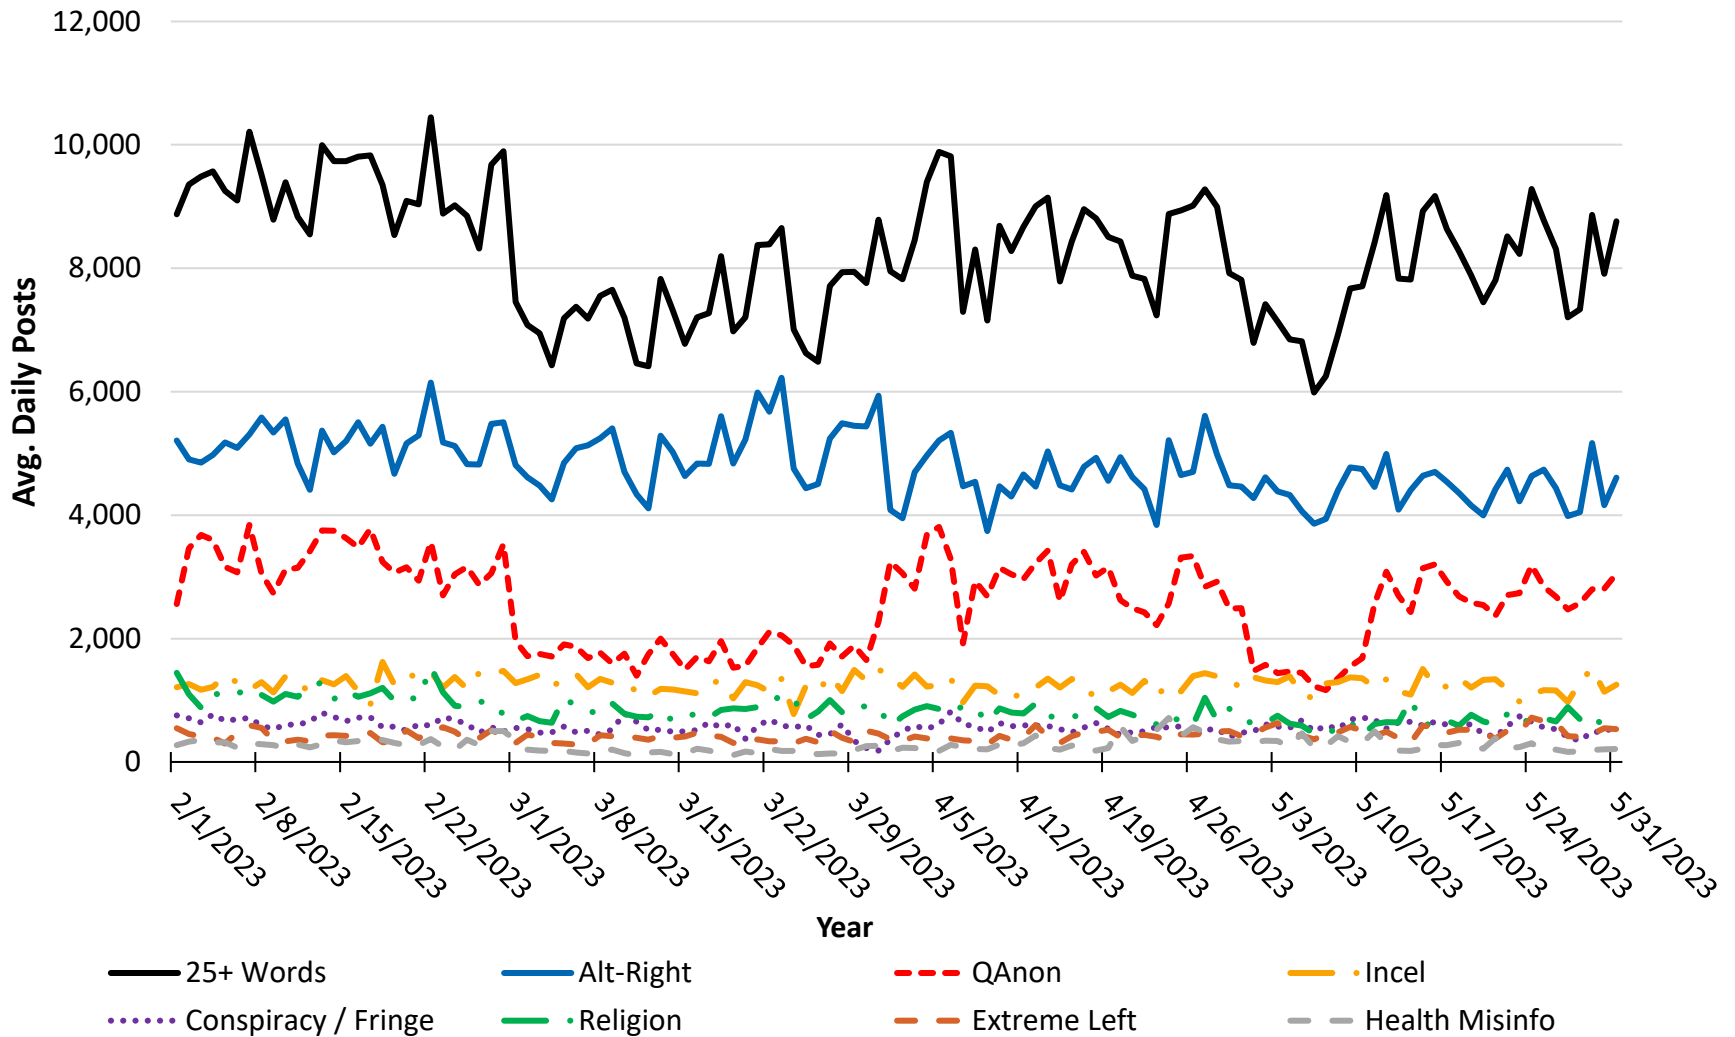

Avg. Daily Activity for Alt-Right Forums for Past Four Months

Note: 577,468 recovered posts. These groups are a subset of forums classified as Alt-Right in Figure 2. The category Extreme Right includes but is not limited to neo-Nazis, Proud Boys, and sovereign citizens. The Political Right includes partisan groups related to MAGA and libertarianism. While this study does not examine mainstream political sites, the discourse of partisan forums selected for the purposive sample often strays beyond normal partisan discourse.

Figure 5

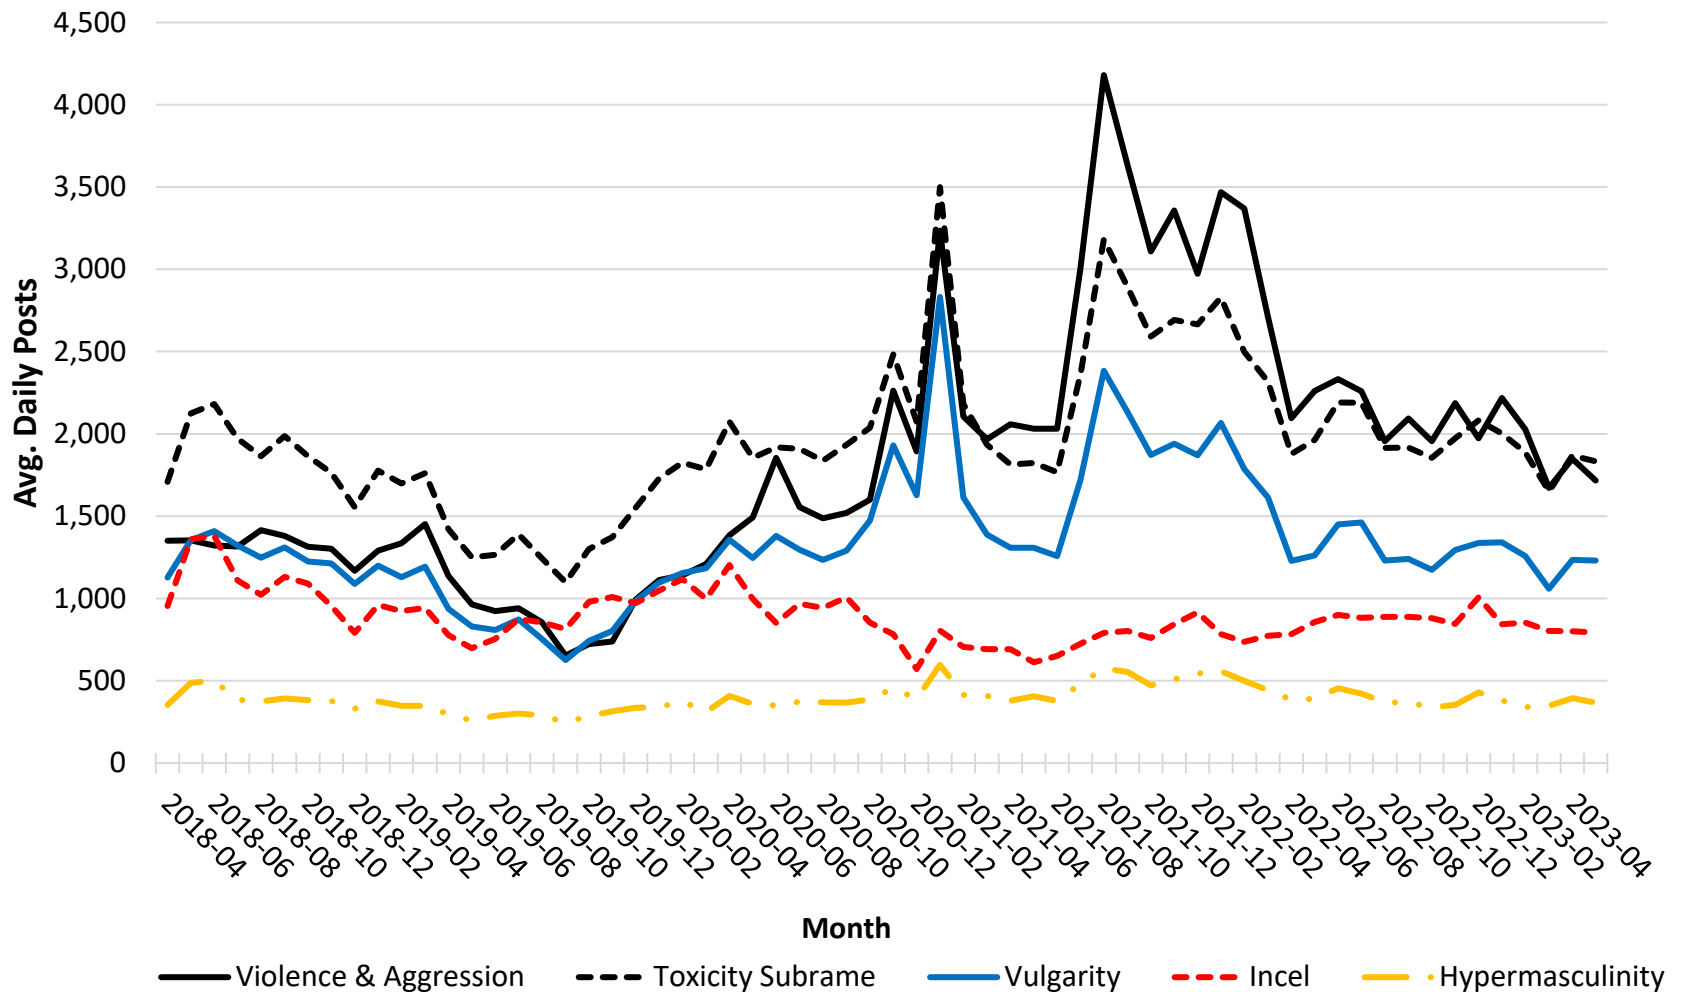

Daily Posts for Most Recent 4 Months

Note: 989,244 recovered posts. Forums and composites are not exhaustive and not mutually exclusive.

Figure 6

Avg. Daily Posts for Violent / Aggressive and Toxic Discourse by Month

Note: The Violence / Aggression subframe had 3,476,136 recovered posts. The Toxicity subframe had 3,708,892 recovered posts. The subframes are not mutually exclusive. Violent /Aggressive discourse is a standalone subframe in the Values frame and excludes references identified with the Military frame. Toxic discourse, also a subframe in the Values frame, includes the use of vulgar language, incel discourse, hypermasculinity, and accelerationism. Accelerationism does not include prophetic discourse (Fig.9).

Figure 7

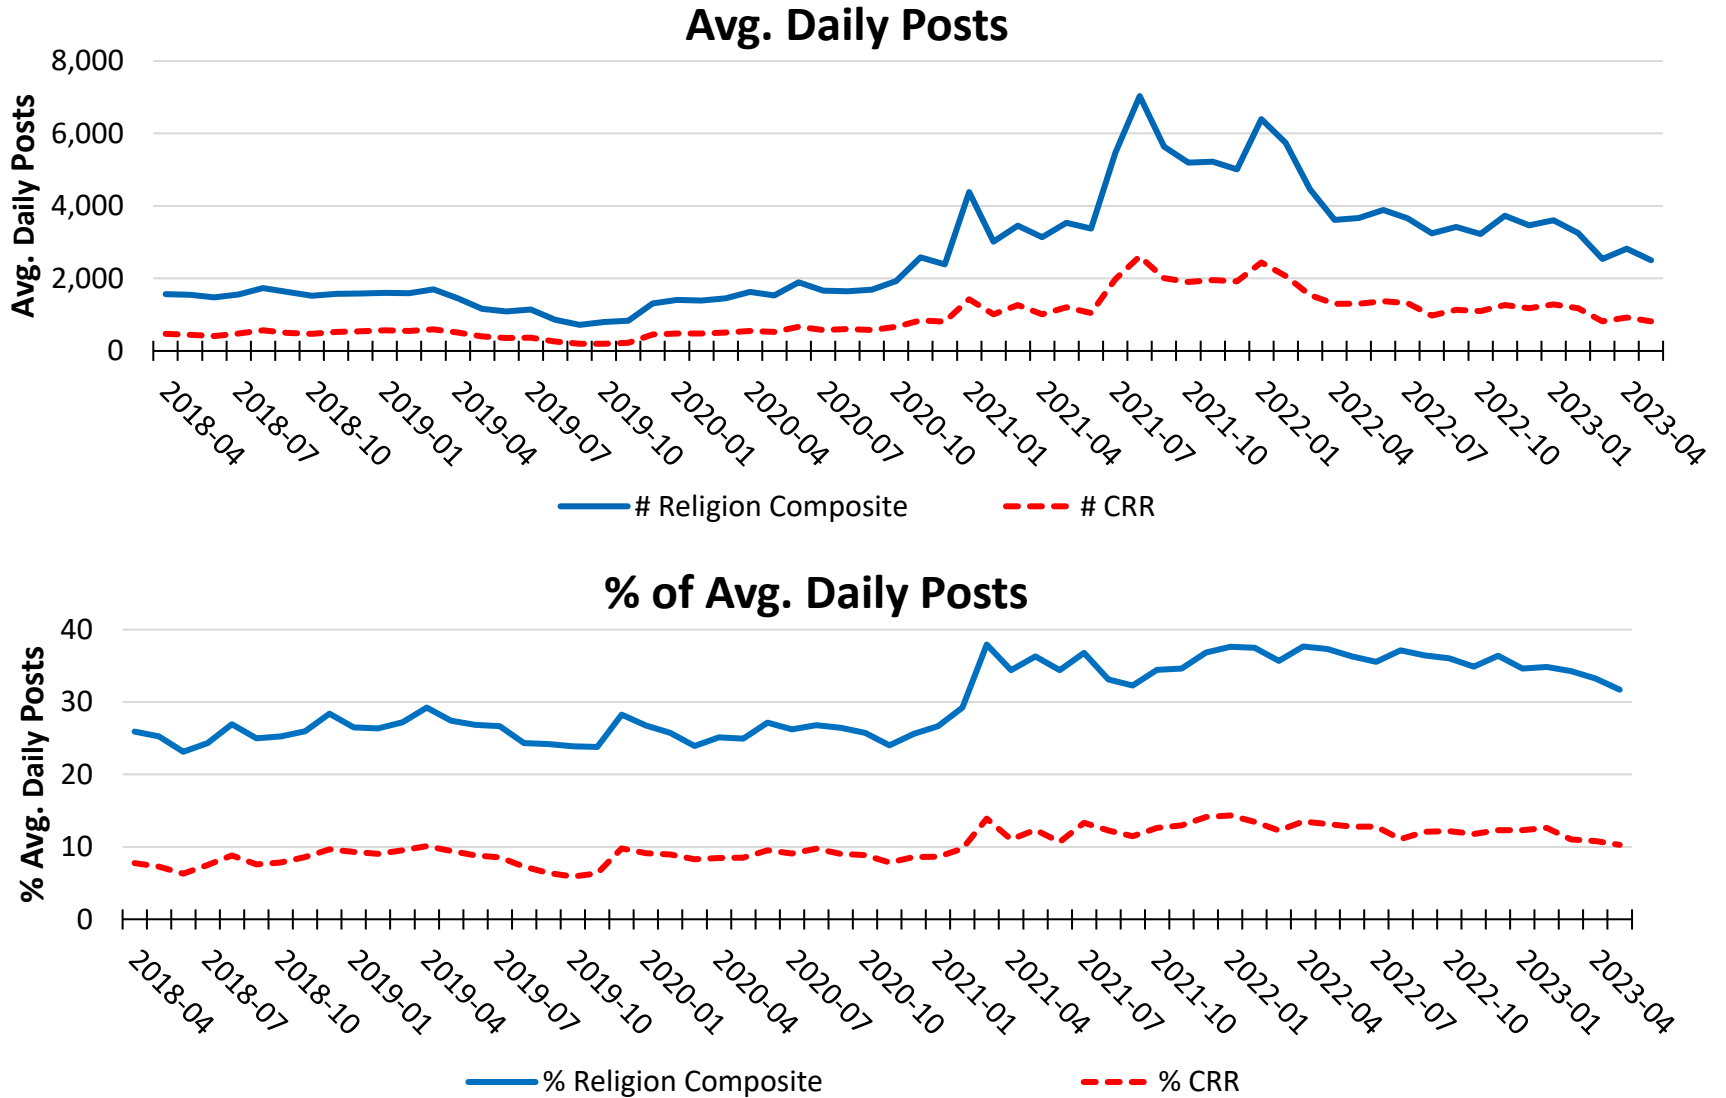

% Posts with Violent / Aggressive Discourse by Forum for Past Four Months

Note: 217,297 recovered posts.

Figure 8

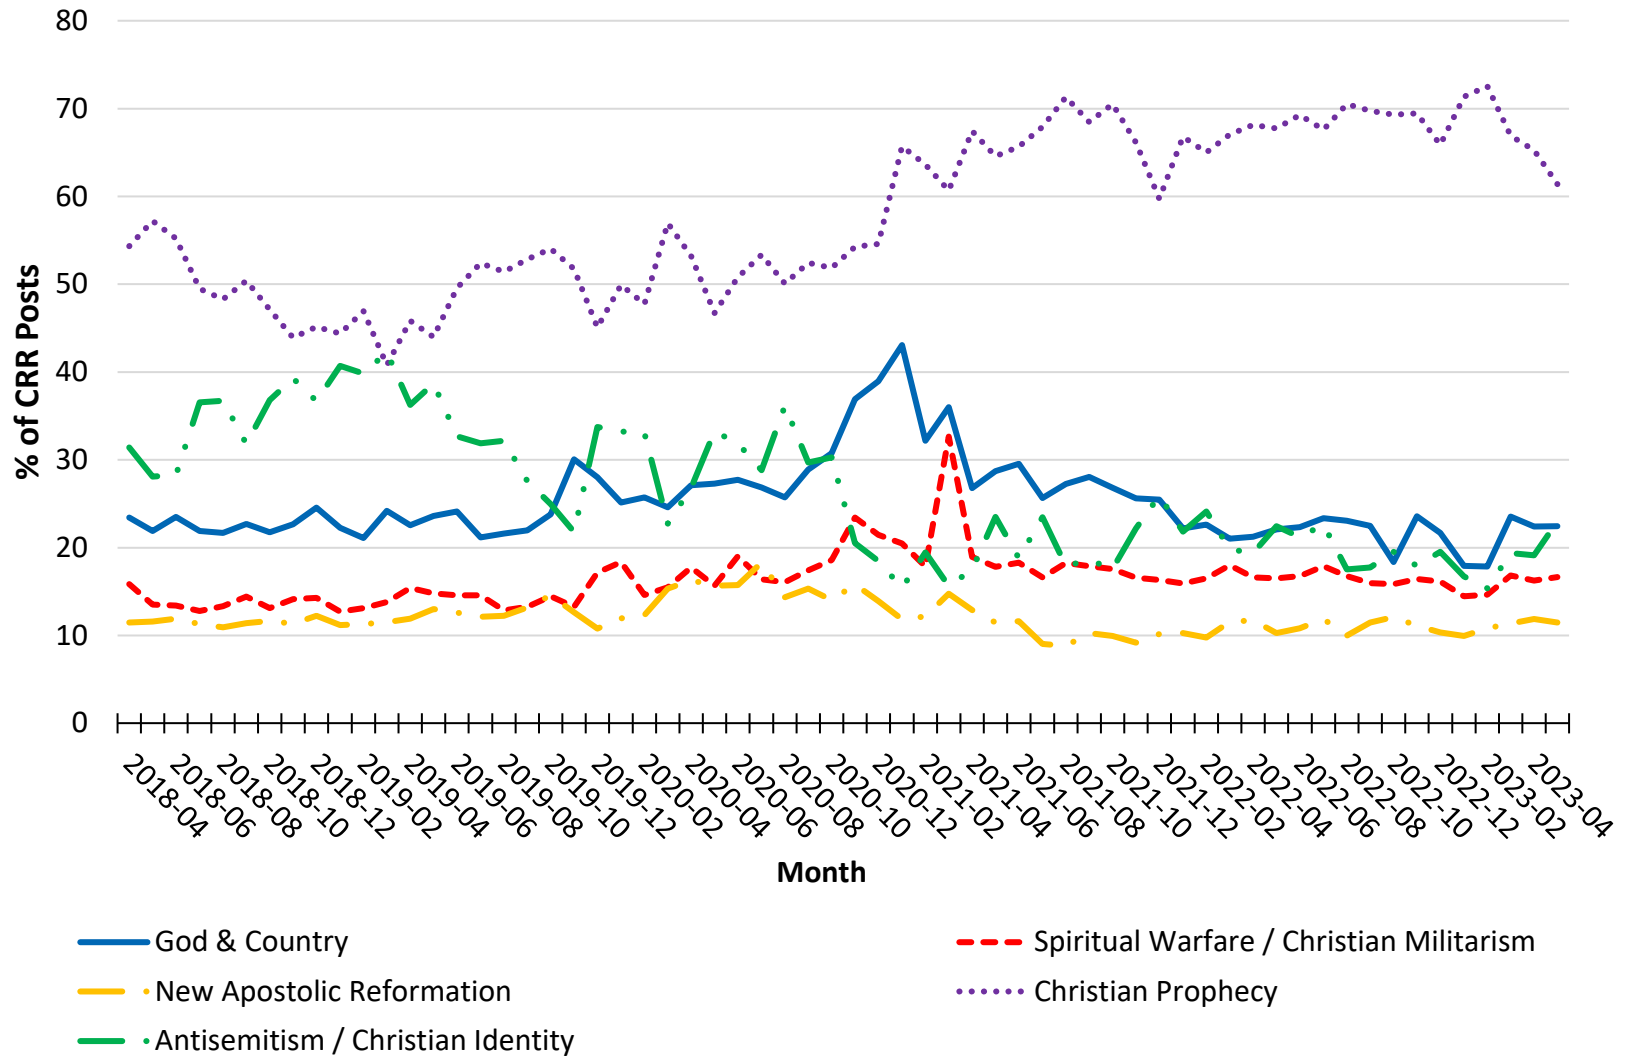

Activity for Religion Composite since April 2018

Note: The Religion Composite had 5,088,962 recovered posts. The Religion Composite combines Religion forums and Religion frames.

Figure 9

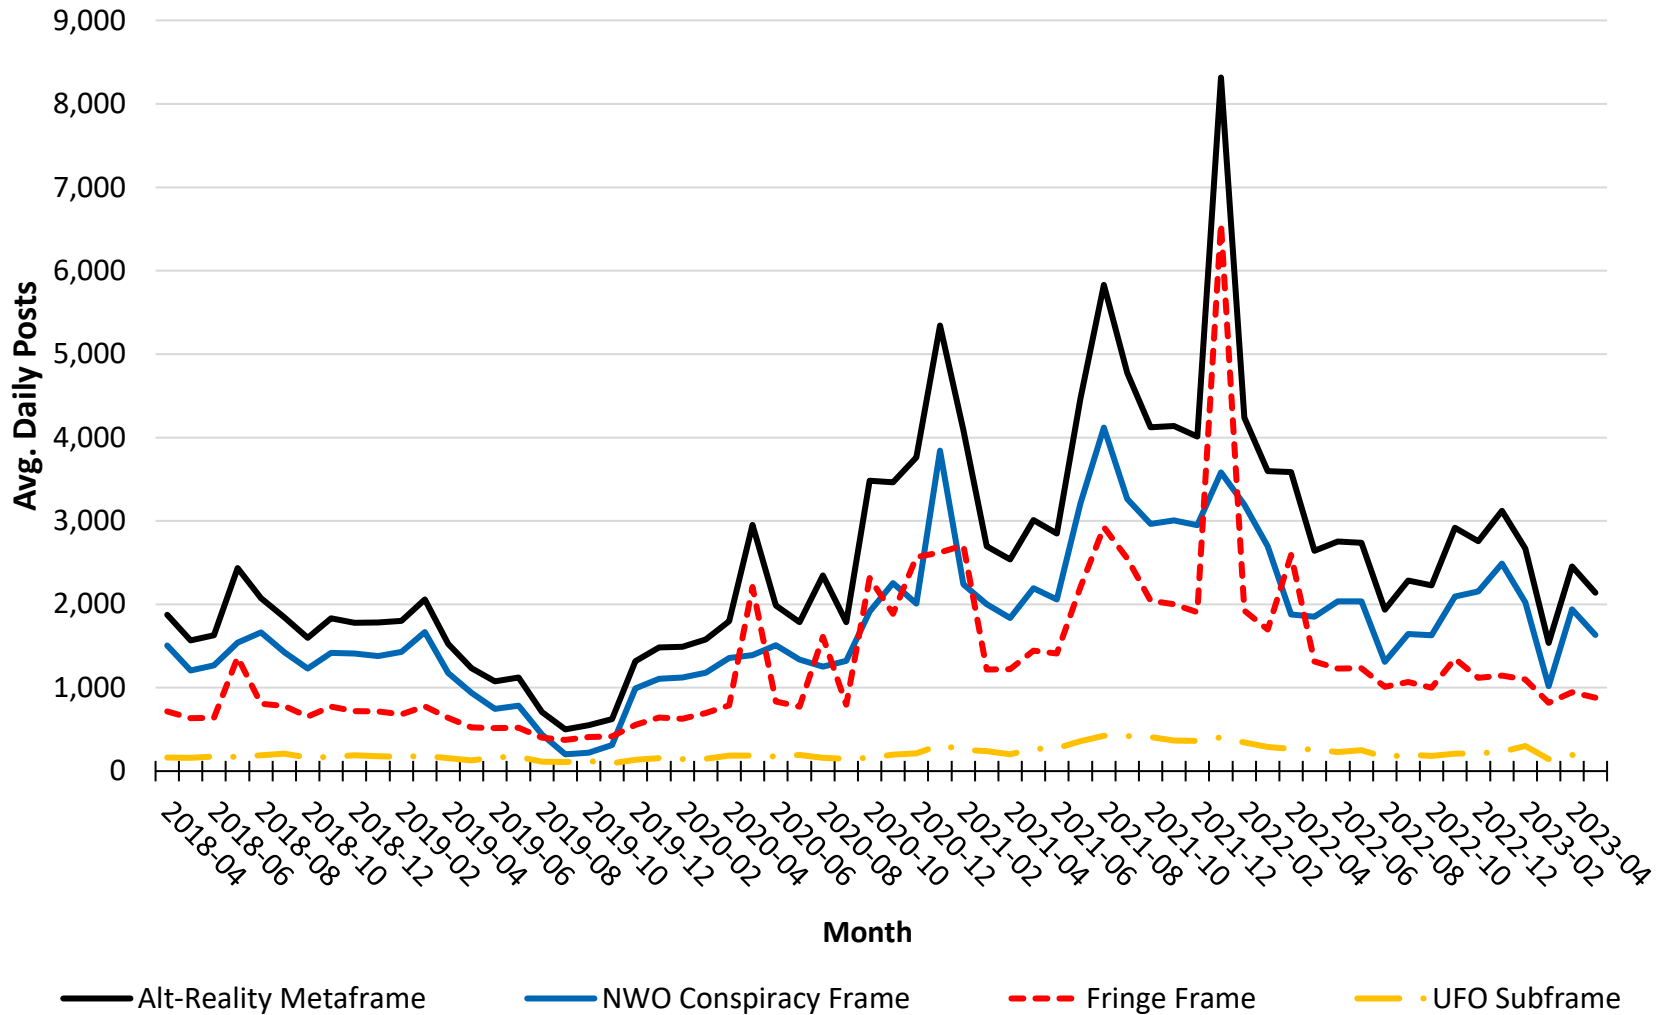

Components of Christian Radical Right as % of CRR

Note: Christian Radical Right based on 1,751,162 recovered posts. Christian Prophecy includes both interpretations of the Bible text and claims to have messages from God about future events. Christian Reconstructionism is not included on this chart due to its small percentage of posts.

Figure 10

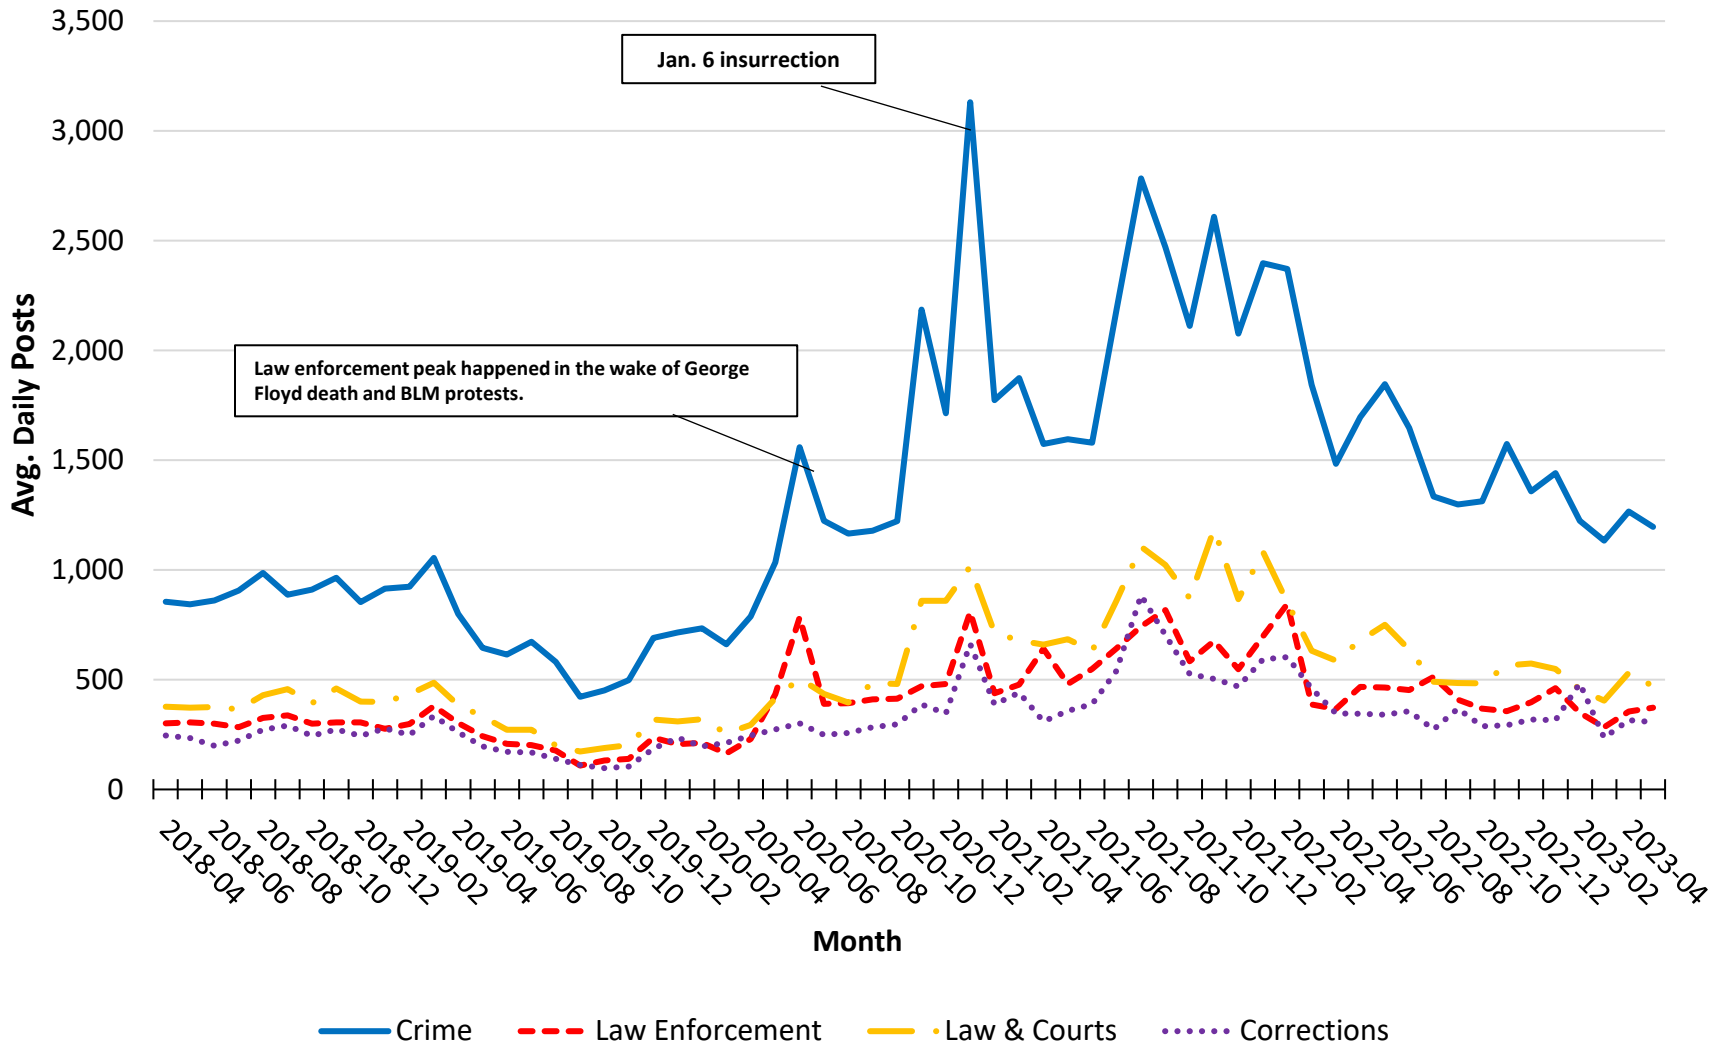

Alternative Reality Themes since April 2018

Note: Alternative Reality Metaframe based on 4,827,847 recovered posts.

Figure 11

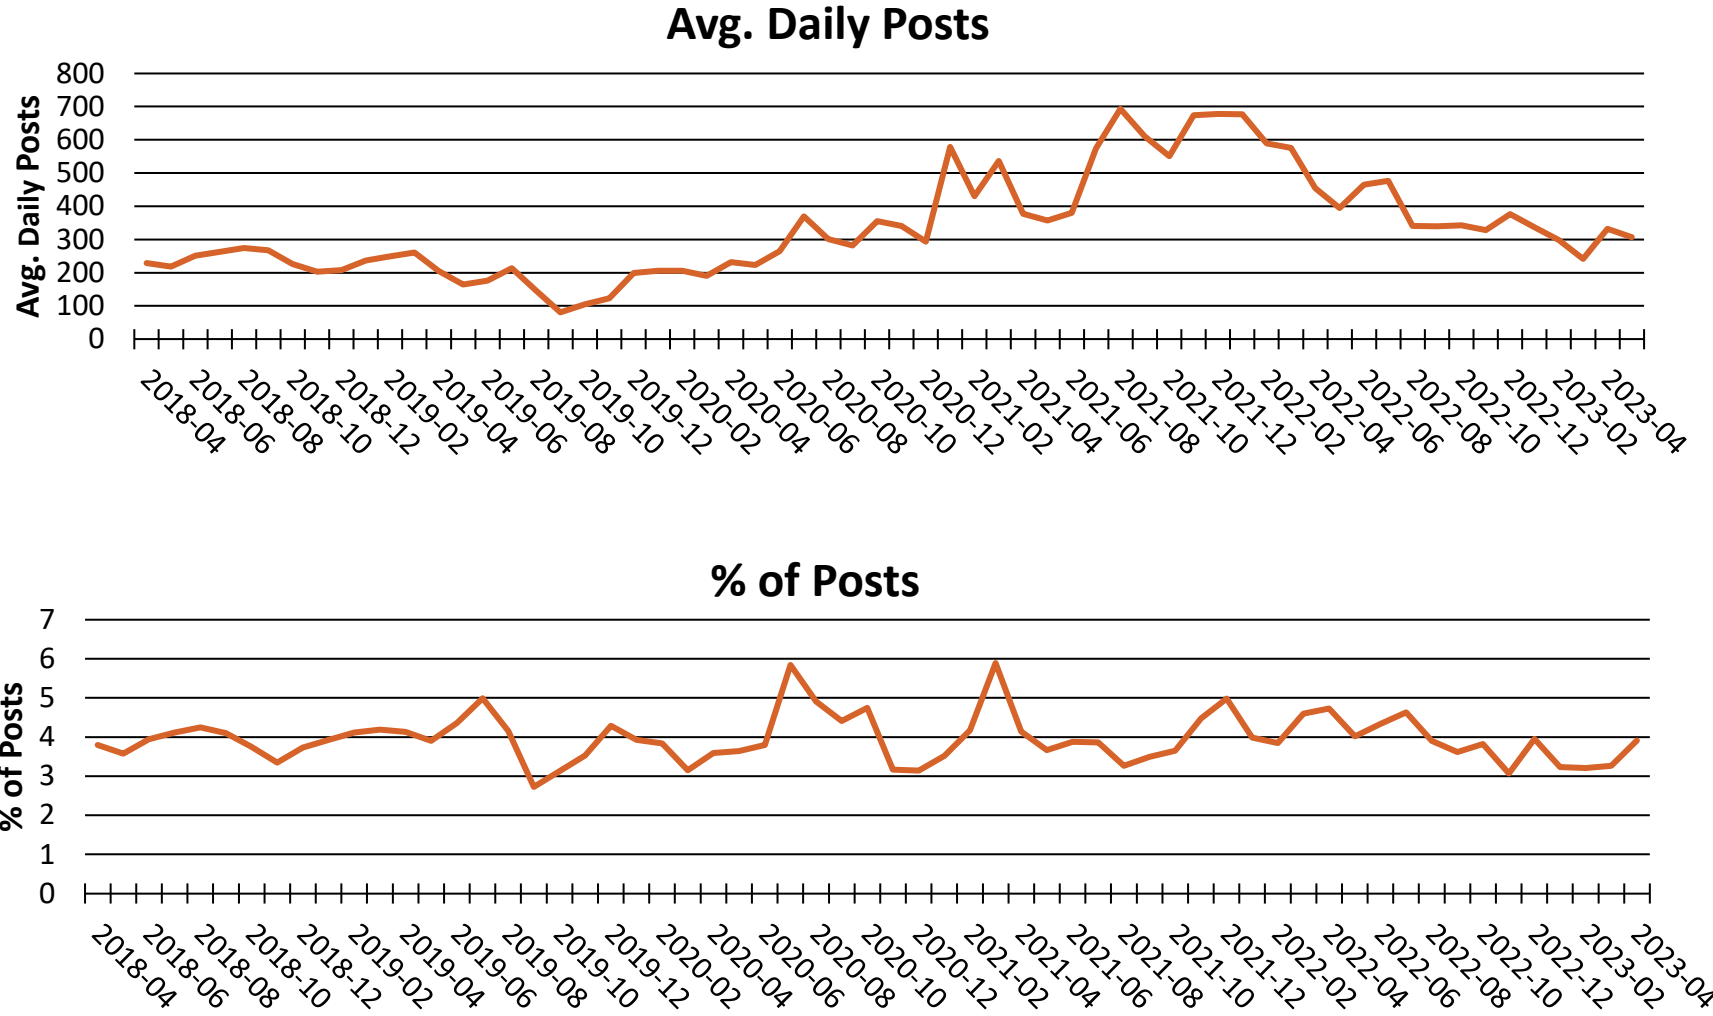

Avg. Daily Activity for Public Safety Components by Month

Note: The Public Safety frame had 3,841,120 recovered posts.

Figure 12

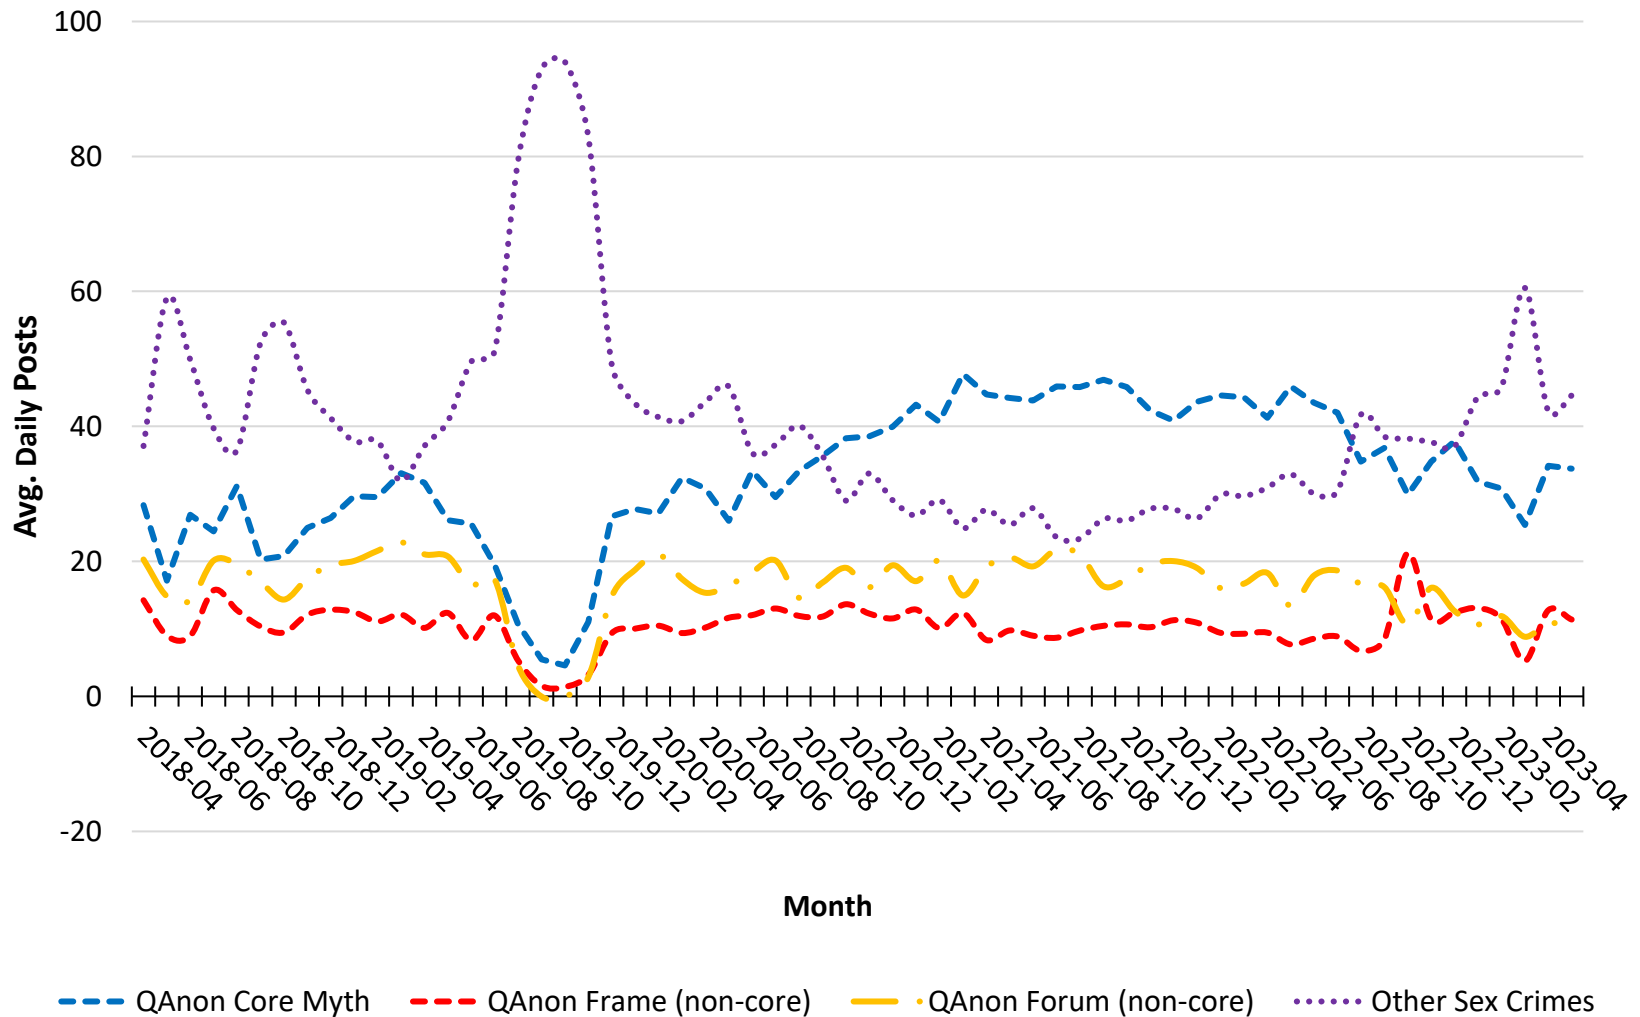

Sex Crime References since April 2018

Note: Sex-crime-related themes were found in 625,879 recovered posts.

Figure 13

Sex Crime References by Source and Month

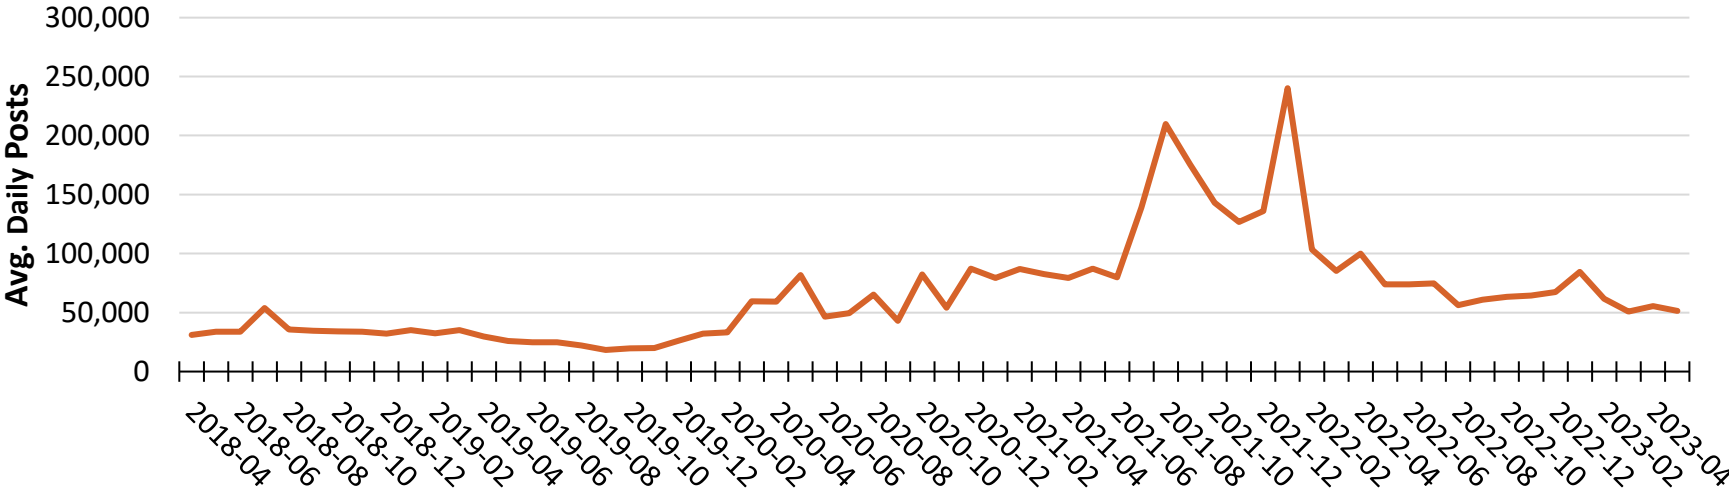

Note: Mutually exclusive categories. QAnon core myth refers to elites (Democrats) engaged in sex trafficking or Satanic sacrifice of kidnapped children. QAnon frame refers to references to sex crimes in QAnon frame that do not qualify as expressions of the QAnon core myth. QAnon forum are references in QAnon forums that cannot be regarded as part of QAnon frame. Outside references refer to discussions of sex crimes outside QAnon universe.

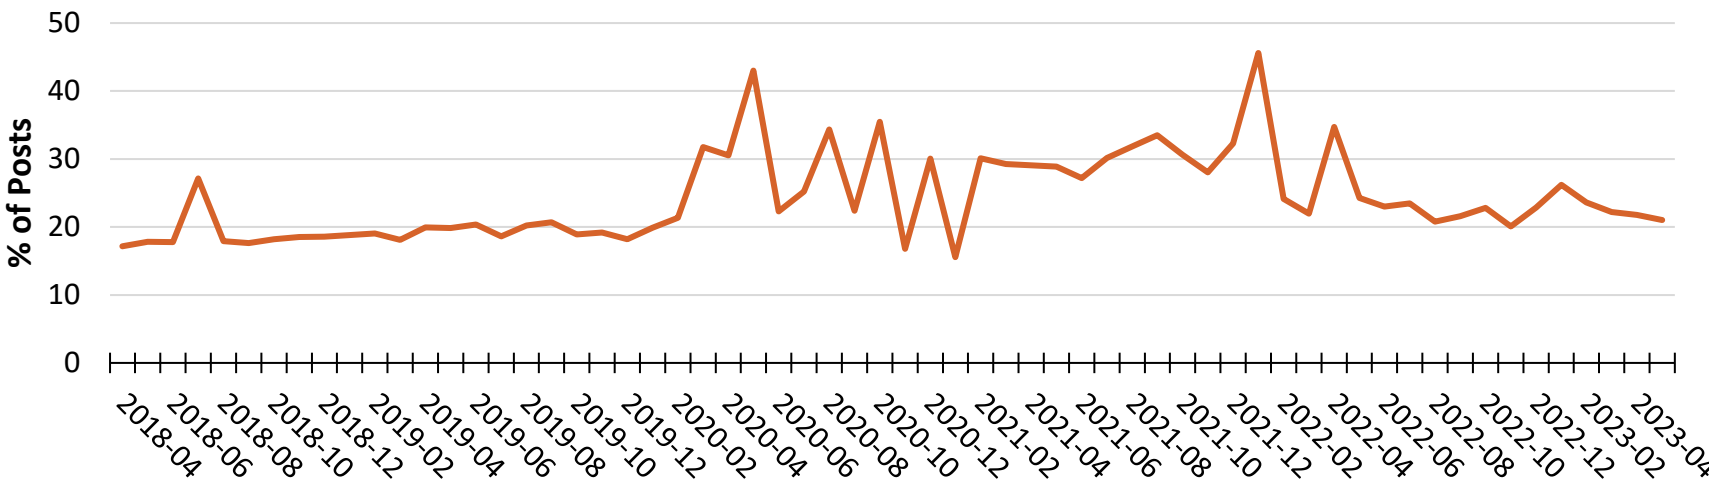

Figure 14

Activity for Health Frame since April 2018

Avg. Daily Posts

% of Posts

Note: Health-related themes were found in 4,123,321 recovered posts.

Figure 15

Health Subframes as a % of Health Frame by Month

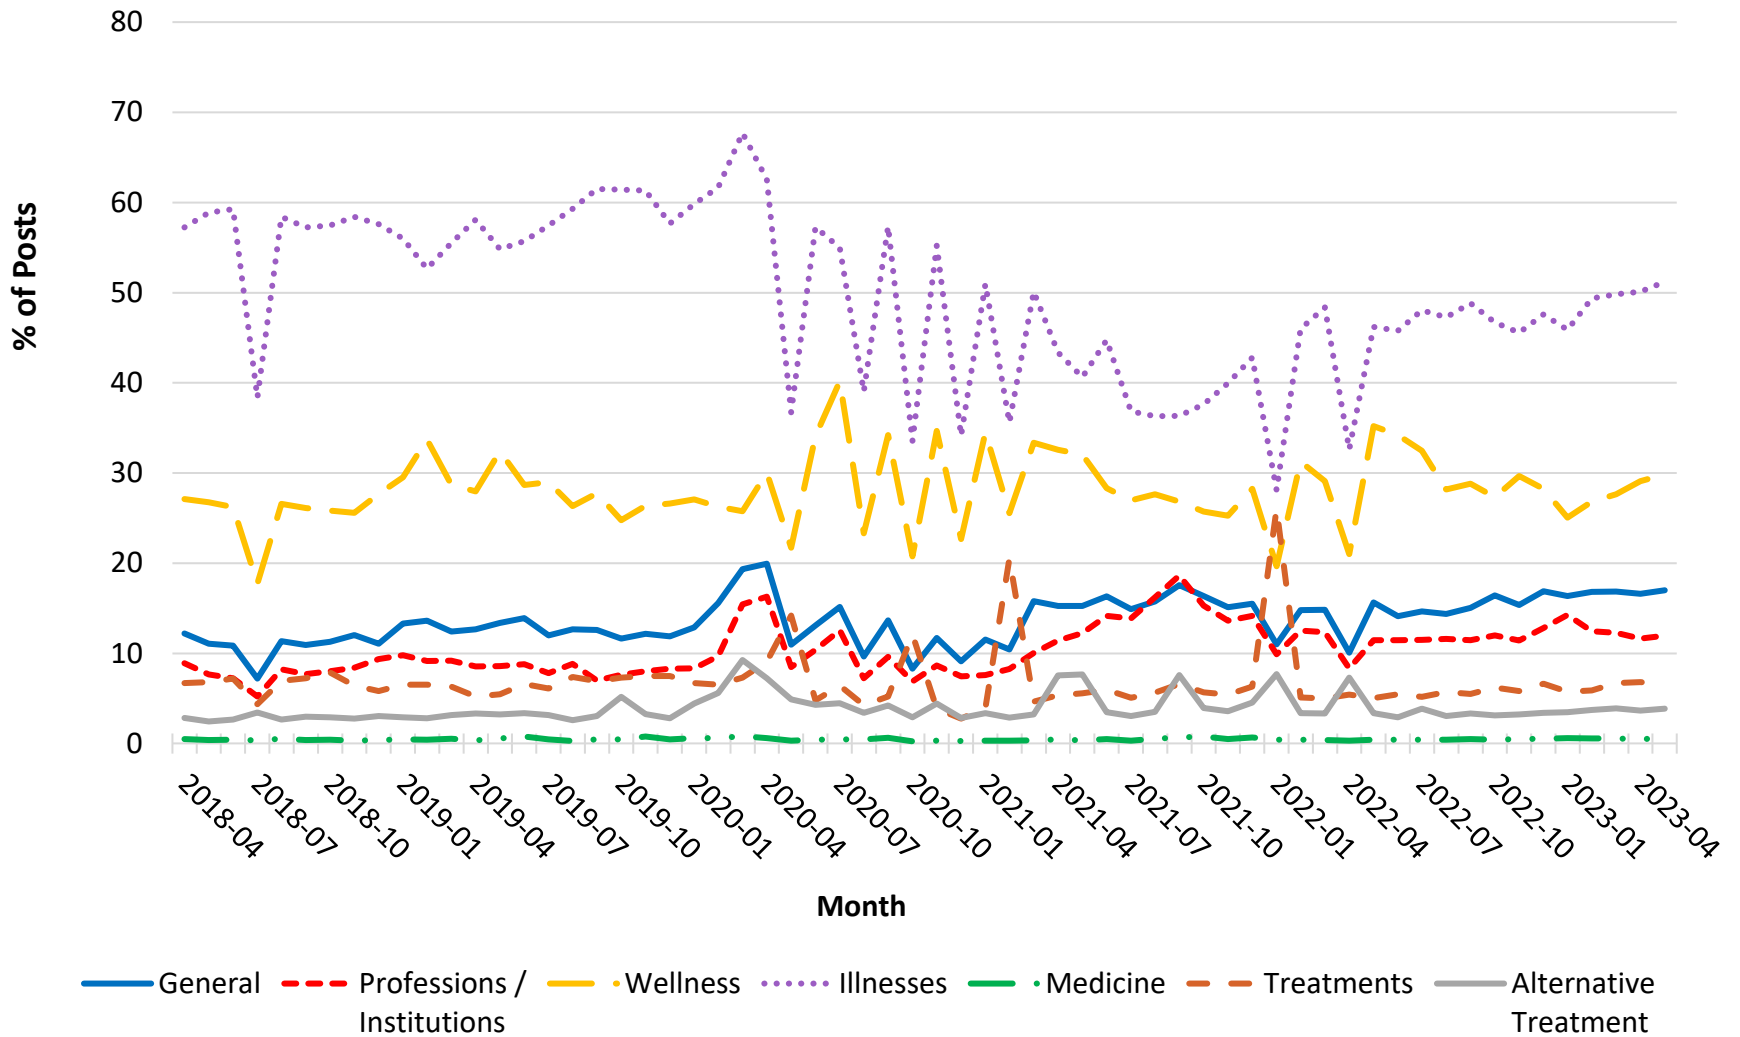

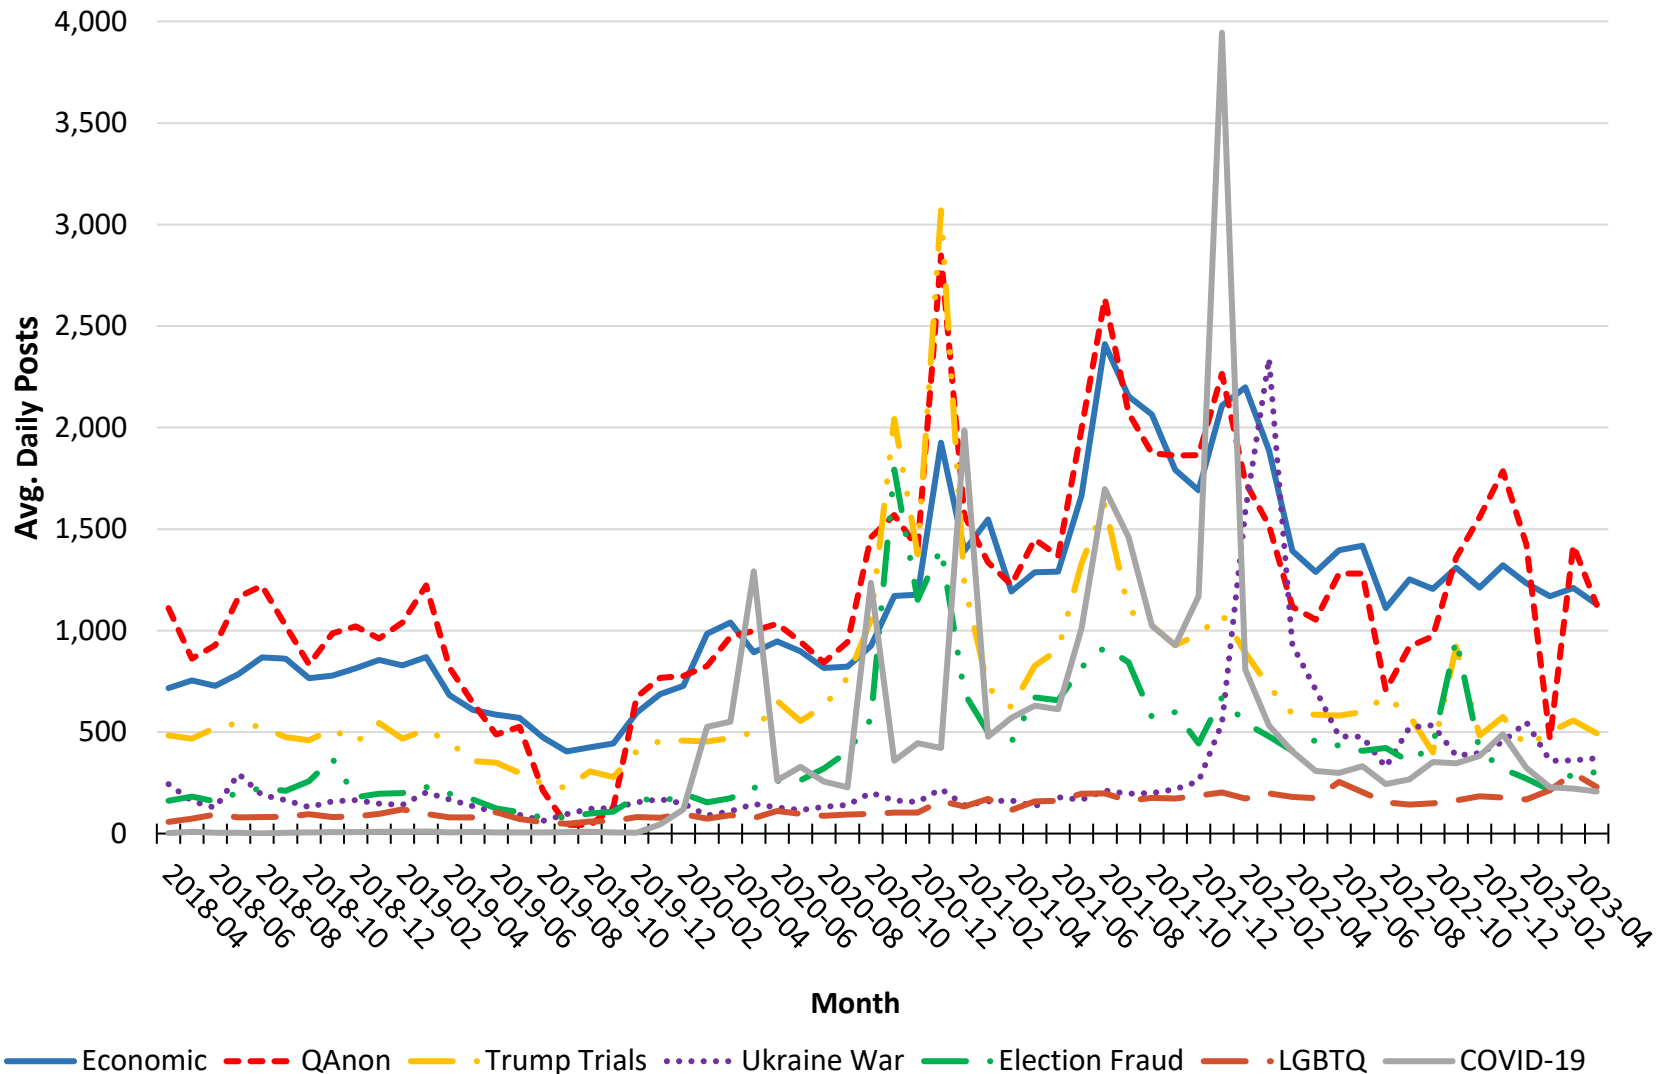

Figure 16

Avg. Daily Posts for Contemporary Topics by Month

Definitions

Forum: A self-defined forum or channel on a web site or social-media platform

Frame: A group of posts identified with a particular theme based on key words, phrases, or stems

Composite: The combination of forums and frames related to the same subject matter. Composites were started to highlight the presence of a large amount of material that falls outside related forums. E.g., most religious discourse happens outside Religion forums.

Activity: % of posts with at least one key word, phrase, or stem identified with particular themes

Forum Types

- **Alt-Right:** A coalition of right-wing groups including the Extreme Right and adjacent and/or sympathetic types of forums, i.e., Political Right, News/Politics, and Religion (Main, 2018).
- **Conspiracy/Fringe:** Forums that spread nonmainstream and questionable beliefs, such as conspiracies, beliefs in UFOS and the paranormal, and alternative positions on science and history. These sites are included in the study because of the argument that extremism and conspiracism are linked (Barkun, 2002).
- **Extremism:** Political beliefs and strategies that fall outside the spectrum of normal politics (Anti-Defamation League, 2017).
 - **Extreme Right** includes antisemitic and Christian Identity forums, neo-Nazis, Proud Boys, secessionists, and White pride groups.
 - **Extreme Left** includes anarchist and socialist forums.
- **Incels:** incel is short for involuntarily incelibate.cThese forums are known for their violent discourse.
- **News/Politics:** Sites that spread news or political comment that is extremist or conspiracist in nature. Mainstream media and Fox News channels are not included.
- **Patriot/Military:** Extremist or conspiracist forums that directly appeal to self-described “patriots,” current members of the military, or military veterans. Groups that call themselves “patriot” often have origins in QAnon.
- **Political Right:** Conservative, libertarian, America First, and MAGA forums that go outside of normal political discourse in their spread of extremist and conspiracist beliefs. Mainstream Republican/conservative forums are not included.
- **QAnon:** Movement that asserts elites (most Democrats) are engaged in the sex trafficking and human sacrifice of kidnapped children. It was claimed that Donald Trump had a plan to end these practices.
- **Religion:** Faith-based forums known to promote extremism and conspiracism. Mainstream religion forums are not included.

Platform Tag Rates from April 2018 to May 2023

Source	Posts	% Total	Tag Rate	% Zero Frames	% One Frame	Avg. Frames
Telegram	4,767,313	29.6	90.9	9.1	19.1	2.9
8kun	3,652,131	22.7	93.1	6.9	16.8	3.6
Incel.is	2,479,712	15.4	93.8	6.2	29.9	2.4
Win Boards	2,365,965	14.7	90.3	9.7	19.4	2.9
Above Top Secret	2,092,275	13.0	86.2	13.8	19.6	2.9
Liberty Forums	177,052	1.1	97.1	2.9	8.3	5.5
Stormfront	133,675	0.8	98.2	1.8	6.2	4.7
Rapture Forum	129,663	0.8	93.5	6.5	15.8	3.7
HexBear	117,722	0.7	87.6	12.4	23.5	2.5
Graham Hancock	101,751	0.6	100.0	0.0	12.1	4.0

Other	162	0.0	98.1	1.9	18.5	3.4
Total	16,122,229	100.0	91.3	8.7	20.2	3.0

Interpreting Key Results

Purposive Sample

- The purposive sample should be thought of as a particular type of indicator, like a stock market indicator. It provides an important look at trends, but it is not the only way that “market” activity can be measured.
- The purposive sample is designed to capture the diversity of the MEC sector and thus may oversample some groups, so it may be hard to compare volume numbers across forum types. Nonetheless, many of the best known channels in the sector are included in the study, so the trends within a forum type are noteworthy.
- I use a disseminated-based strategy to manage the complications of informed consent and protect confidentiality and copyright ownership of content creators and platforms (Franzke et al., 2020).

Definitions

- *Average Daily Posts*: The number of posts divided by the number of days in the time period.
- *Prevalence Rate*: The percent of posts where a particular theme is present. The effect size for prevalence rates is interpreted using Cohen’s g with no frame activity as the benchmark. As a result, a high or large amount of activity is deemed present when the prevalence rate exceeds 25%, a moderate level of activity is achieved above 15%, and a small activity is regarded as present at 5%.

This report identifies patterns and tracks trends related to the framing of social and political extremism in conspiracy and right-leaning extremist discussion forums. The methodology implements automated text analysis based on key words, phrases, and word stems on a purposive from 13 major web-based and social-media platforms.

These numbers are top-line and are released through monthly and quarterly reports to facilitate timely monitoring. Although the trends in activity are interesting in themselves, the reports are not “market share” or “share of voice” reports because of the purposive nature of the sample. It is quite easy to get a different result simply by chance the mix of online forums. For example, if I want the religion frame to be the largest, I add more religion forums.

In spite of this limitation, the following should be noted:

1. Findings from the study are credible because the research includes several large, well-known discussion forums that are regarded as newsworthy.
2. Looking at the trend lines is a logical first step, even in a purposive study, if for no other reason than to see if the times lines correspond with known trends.
3. While the absolute numbers are easily misinterpreted when discussing overall volume and comparisons across sites, the use of a purposive sample can yield meaningful conclusions about trends within an online community, and comparisons of characteristics of online communities can be reasonably made when the data is standardized, e.g., comparisons are made on percentages and not absolute values.

The intent is not to address all issues in a single document. Rather, activity reporting is the first step in addressing key qualitative questions about how conspiracists and extremist movements coopt existing mainstream beliefs and practices to legitimate their positions and mobilize followers. The key questions include:

1. What frames are used to legitimate extremist views and interpretations of current events?
2. How has the use of frames in support of extremism changed over time?
3. What interactions are forming between frames?
4. To what extent do extremism, conspiracism, and fringe beliefs constitute a unified system of ideology, and to what extent are they decoupled?
5. To what extent are extremism, conspiracism, and fringe beliefs becoming mainstream?

Some specific issues are tracked with an eye on further research:

1. To what extent is religious discourse turning militaristic?
2. To what extent is political discussion turning violent? Most notably I am paying attention to the ongoing promotion of conspiracy theories surrounding the 2020 presidential election.
3. How is the core mythology of QAnon evolving?
4. How is QAnon and other New World Conspiracy theories interacting with religious communities?
5. What is hypermasculinity, and how is it influencing extremist discourse?
6. What conspiracy theories and misinformation are infiltrating the discussion of the COVID-19 pandemic?

The quarterly reports will provide the most detailed top-line analysis, supplemented by monthly updates through flash reports. In addition, separate reports regarding the tracking of trends related to left-wing extremism, public-health (mis)information, and religion forums are in development. Detailed analysis of trends will be handled through peer-reviewed publications.

Coding has been made public and a link to a publicly shared Google drive can be online at <https://www.rogersperspectives.com/tracking-of-extremism-report>
